

SCR3310

The Premier USB Smart Card Reader Solution

Overview

The SCR3310 continues the line of SCM Microsystems' market-leading smart card reader products based on the STC II smart card interface chip. It supports multiple security applications including PKI, digital signature and personal identification, all in a compact, mobile device.

The device includes support for USB and relevant security standards.

Together, these features enable high performance, cost effective programs for secure logical access in any environment.

Compact and elegant, the SCR3310 offers the best price/performance ratio in the market.

SCR3310 Benefits

- On-board flash for seamless firmware upgrades - prevents obsolescence
- EMV 2000 Level 1 and PC/SC certification in a single solution
- High communication speed performance
- Fully tested and compliant with all ISO 7816 smart cards in the market
- Fully tested and compliant with all major memory smart cards in the market
- Customizing options: case, colors, and company logo

The SCM Microsystems' Advantage

SCM Microsystems brings over a decade of experience in ASIC and smart card reader development to this unique product. With its dedicated Research and Development team, and a true global presence, SCM Microsystems delivers high quality products catering to the various requirements in the security field. SCM offers customization of products to suit application needs. Typical advantages of an SCM Microsystems product includes:

- More than 80 patents
- High quality mass production capability
- Industry endorsed SmartOS™ middleware
- Support for all current and emerging international standards
- Customer base of global, top tier PC OEMs, systems integrators and smart card industry leaders
- Direct significant long-term relationships with all leading smart card manufacturers and application providers
